REHAU RAUKANTEX Edgebands under EU Chemicals Regulation REACH

Dear customer,

With reference to the Regulation (EG) 1907/2006 (REACH), REHAU has taken all necessary measures in order to meet the requirements.

a) Registration of substances

REHAU exclusively uses registered raw materials.

b) SVHC duties to communicate information

The candidate list dd. 4 February 2026 which can be found on the ECHA homepage, contains a total of 253 "substances of very high concern" (= "SVHC") for which there is a duty to communicate information from a content of more than 0.1% acc. to Article 33 of the REACH regulation.

Our RAUKANTEX edgebands made from ABS, PP and PMMA do not contain more than 0.1% of any of the "substances of very high concern" listed on the currently valid "Candidate list of substances for inclusion in annex XIV" resp. annex XIV.

REHAU will fulfil its duties to communicate information according to Art. 33 of the regulation for future deliveries voluntarily to the best of their knowledge if such duties exist. To this end, as a REHAU customer you will be informed by way of a printout on your order confirmation and the delivery note about the "substances of very high concern" that are potentially contained in the articles that we supply.

Our internal REACH team continuously monitors developments and changes in this area. This also includes monitoring ECHA publications, including revisions of the "Candidate list of substances for inclusion in annex XIV".

REHAU does not produce articles that intentionally release substances. Therefore, a duty to communicate information and to register substances does not exist.

c) Restrictions via REACH Annex XVII

REACH Annex XVII regulates restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles. If used as intended, the products you purchase from us are not restricted by Annex XVII. Commission Regulation (EU) 2023/1464 adds a restriction on Formaldehyde (CAS No 50-00-0) to Annex XVII, entering into application August 6, 2026.

This is to confirm that our RAUKANTEX edgebands made from ABS, PP and PMMA do not contain any intentionally added Formaldehyde.

d) Safety data sheet

The products that your company procures from REHAU are usually articles within the definition of the REACH regulation. For this reason, we kindly ask you to understand that we do not provide you with safety data sheets for the articles delivered by us as this is not envisaged in the regulation.

If mixtures are delivered, the appropriate safety data sheets are provided locally through our sales representatives or customer portals.

e) REACH contacts

For specific questions on REACH, the employees of our sales offices, through whom you normally process your orders, are primarily available. Questions that cannot be answered by them will be forwarded internally to experts.

Furthermore, the signatory of this letter may also be contacted. You may also send us your questions via e-mail to reach@rehau.com.

Best regards
REHAU Industries SE & Co. KG
