Алмазная гравировка — один из видов декора стекла или зеркала, при котором алмазный диск фрезерует поверхность, нанося на нее рисунок. Внешний вид таких рисунков напоминает изделия из хрусталя и ассоциируется с роскошным алмазным блеском.

Алмазная гравировка широко используется в области декора интерьера — зеркала, настенные панно, мебельные фасады, двери, душевые кабины. Применение такого оригинального декора поистине безгранично.

Гравировка производится на высокоточном обрабатывающем центре с ЧПУ, благодаря чему гарантируется высокое качество грани, без сколов и отливов.

Различают два вида поверхности алмазной грани — шлифованная и полированная.

Шлифованная грань является матовой, непрозрачной. Нанесенная, например, на зеркало, она контрастно смотрится и выделяется на общем фоне.

Полированная грань является прозрачной, за счет преломления и отражения света способна создать необыкновенную атмосферу в помещении.

Также гравировка различается по форме: U- и V-образная. V-образная грань, фактически, является аналогом facets, за счет этого возможно создание имитации сложных фасетных композиций при единой, целостной конструкции изделия.

Ширина гравировки варьируется в зависимости от типа фрезы: 6, 8, 10 и 12 мм.

Минимальная толщина стекла или зеркала для выполнения гравировки — 4 мм.

Максимальный размер изделия — 1500x3000мм.
